ACSM's Resources for the Exercise Physiologist, Second Edition. This book provides coverage of anatomy, exercise physiology, biomechanics, behavior modification, and nutrition as well as assessment of strength and flexibility and the development of resistance and cardiorespiratory training programs.

Exercise Physiologist | ACSM Certification

What are the ACSM guidelines for aerobic exercise? To maintain cardiorespiratory fitness and weight control, the recommendations state that aerobic exercise should be performed three to five days a week for 20 to 60 minutes at an intensity that achieves 55 to 90 percent of the maximum heart rate and 40 to 85 percent of the maximum oxygen uptake reserve.
