PHMSA had incorporated by reference the 2001 edition of the ASME BPVC into part 192 effective July 14, 2004, and the divergence between the required test factor in § 192.505(b) and section VIII, division 1 of ASME BPVC persisted until the Miscellaneous Rule became effective in 2015.

### **Federal Register :: Pipeline Safety: Gas Pipeline ...**

J and P are not 'connectors'. J is Jack and P is Plug Jack is defined as 'the least movable part in a connector assembly'. SO the part on the board is J while the cable end is P. The zener symbol is wrong. BJT's are NOT current controlled ! that is a huge misconception. The base-emitter current is a side effect. Look up
