ASME and ASTM grades are directly comparable and are often written A/SA 516 or SA/A 516 which is the same as A516 or SA516. ASTM (which is derived from the American Society for Testing and Materials) and ASME (American Society of Mechanical Engineers) work closely together and many of their standards are

ASME SA516 grade  
introduction: SA516  
grade 55, SA516 grade  
60, SA516 grade 65,  
SA516 grade 70. These  
4 grades are mainly  
defined by their  
different tensile and  
yield strength range,  
which is influenced by  
content of Carbon. For  
example sa 516 grade
