at a desk for every hour spent at the telescope. That's how long the routine analysis of data took with pencil, paper, and logarithmic tables. Thus when Wilhelm Olbers discovered the minor planet Vesta in 1807 and gathered the necessary observations, his friend Gauss needed almost 10 hours to hand calculate its ...

Stars form when clouds of gas and dust fragment and collapse, forming flat disks

Read PDF Astronomy On The Personal Computer Alexpa

of material that feed the young stars' growth. Many times, even most times, this creates multiple stars, two or more stars orbiting each other. Models have predicted that triple stars (called trinarities) can, through the stars' gravities, carve bizarre and fantastic shapes in the disks around them.
