help solving my heat issue. My engine is new (bored and stroked LS3, 418 cu.in.), and only has 250 miles on it. The first 200 miles it never went above 210 but lately it's been hitting 230 on my gauge. I swapped out the factory style thermostat for a MR Gasket brand 180 which states the engine will run cooler.

running hot(??)

Gen III/IV engines are typical V-8s with respect to the cooling system, so they do not require huge radiators or special metals. What they do require is a radiator that is rated for the job. With the smallest LS engines easily making 300 hp, you don't want to use a stock 4-cylinder or V-6 radiator.
