12d Model - Civil Engineering, Water engineering & Land ...

In V10, 12d Model introduced the use of XML reports for a few of the reporting options in the software. Prior to this any customisations or modifications to the formatting of reports by clients required either manual editing in a text editor or in 12d- e.g. deleting columns, changing headings, etc, or a custom 12d app to be written.

Customising XML reports in 12d Model - Part 1

SST-macro simulates many parallel processes, but itself runs as a single process with only one address space (SST-macro can actually run in parallel mode, but we ignore that complication here). SST-macro manages each parallel process as a user-space thread (application thread), allocating a thread stack and frame of execution.
