The World of the Cell. Addison Wesley Longman Inc., USA (2) Mader, S.S. (2011).Biology 10th Ed. Mac Graw Hill Education, USA. 49. INTRODUCTION (5 MINS) Introduce a simplified life cycle of a human being or plant. Let the learners identify the changes throughout the different stages and how these organisms grow and develop.

**GENERAL BIOLOGY TEACHING GUIDE - SlideShare**  
Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction.Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.
