Tropical Buildings

Both tropical and temperate rainforests are characterized by tall trees that create a canopy well above the ground. Some plants have adapted to the climate beneath the canopy by growing as epiphytes, which means they grow on the branches or trunks of the larger trees.

How Does the Climate Affect the Ecosystem of the ...

Climate change is of great concern for the tourism industry and there are several reasons why, as illustrated in a new report from GreenBiz. “More than many other industries, tourism relies on a stable climate, whether attracting customers to lavish lakes, bountiful beaches or majestic mountains,” notes Mike Hower.

How Climate Change Is Affecting Tourism | TravelPulse

Brazil - Brazil - Climate: Brazil has a humid tropical and subtropical climate except for a drier area in the Northeast, sometimes called the drought quadrilateral or drought polygon, that extends from northern Bahia to the coast between Natal and São Luís; that zone receives about 15–30 inches (375–750 mm) of precipitation a year. Much of Brazil receives 40–70 inches (1,000–1,800 mm ...
