A language processing disorder (LPD) is an impairment that negatively affects communication through spoken language. There are two types of LPD—people with expressive language disorder have trouble expressing thoughts clearly, while those with receptive language disorder have difficulty understanding others. One person with a language disorder might find it difficult to speak extemporaneously or outline what they

Computational Linguistics And **Language Processing Disorders: Recognizing Symptoms**

Language Processing Disorder in Children You might have had the experience of being unable to come up with the right word. You're in the middle of a speech or a conversation or sharing a story, when suddenly the word you are searching for gets stuck "on the tip of your tongue" or suddenly escapes you.

Characteristics of Language Processing Disorder in ...

Language processing refers to the way humans use words to communicate ideas and feelings, and how such communications are processed and understood. Language processing is considered to be a uniquely human ability that is not produced with the same grammatical understanding or systematicity in even human's closest primate relatives.
