The Human Instinct How We

In *The Human Instinct*, he rejects the idea that our biological heritage means that human thought, action, and imagination are pre-determined, describing instead the trajectory that ultimately gave us reason, consciousness and free will. A proper understanding of evolution, he says, reveals humankind in its glorious uniqueness—one foot planted firmly among all of the creatures we've evolved alongside, and the other in the special place of self-awareness and understanding that we alone ...

The Human Instinct: How We Evolved to Have Reason ...

With “*The Human Instinct: How We Evolved to Have Reason, Consciousness and Free Will*”, Kenneth R. Miller offers a fascinating, insightful and memorable statement on the use and abuse of modern evolutionary theory, not only by creationists and other skeptics of evolution, but especially, by those who believe that human behavior is directed solely by Natural

place of self-awareness and understanding that we alone ...

The Human Instinct: How We Evolved to Have Reason ...

In *The Human Instinct: How We Evolved to Have Reason, Consciousness, and Free Will*, Miller makes the opposite case—that evolutionary theory proves our special place among life on Earth—by pulling from biology, paleontology, philosophy, and neuroscience. What Miller has done, to paraphrase his editor, is write an evidenced-based pep talk for the human species.

The Human Instinct: A Conversation with Ken Miller ...

Most religions, writes the author, “agree on one thing, which is the uniqueness of the human species and the need for a special story to explain how we came to be....By telling us that we do not have such a story, by placing our origins squarely in the ordinary genetic, environmental, and selective processes that
