Backbone Communications ...

In fact, the broadband access gap between Sub-Saharan Africa and the rest of the world is getting wider just as the gap in basic voice communications is getting smaller. Increasing access to broadband connectivity is therefore emerging as a high priority for policy makers across the continent. This book

Online Library Broadband For Africa Developing Backbone Communications Networks

begins with a brief review of the ICT market and considers the extent of demand for broadband and the ICT services that high-capacity backbone networks make possible.

Over 500,000 kilometres of backbone

Online Library Broadband For Africa Developing Backbone Communications Networks

infrastructure has been rolled out in sub-Saharan Africa, but only about 12% (about 60,000 kilometres) is fibre-optic cable. The remainder is microwave, mostly backbone for mobile phone operators. Most fibre backbone is used for fixed-line backhaul.

Rural Broadband Backbone - APC

Online Library Broadband For Africa Developing Backbone Communications Networks

Africans are now demanding full wire-line internet access in both urban and rural areas. African policymakers are being pressed to speed deployment given the never-ending demand for more bandwidth. This book is interesting if you contrast the task of building backbone against the way bband was deployed in the United States.
