Inequalities Graphing Inequalities with Positive Rational Numbers Given simple verbal inequality statements, students represent the inequalities in symbols and on number lines. They will determine if given values are solutions to the inequalities. 6.EE.B.8 • Solving One-Step Linear Inequalities Students solve one-step inequalities algebraically.

© 2011 Carnegie Learning The solution to any inequality can be represented on a number line by a ray whose starting point is an open or closed circle. A ray begins at a starting point and goes on forever in one direction. A closed circle means that the starting point is part of the solution set of the inequality.

Solving Linear Equations and Inequalities Summary

equation or inequality, students are preparing to solve linear absolute value equations and inequalities, exponential equations, and quadratic equations and inequalities. Compound Inequalities The compound inequality shown involves and , and is a conjunction: $x \neq 1$ and $x \leq 23$. The solution is the region that satisfies both inequalities: $23 \leq x \neq 1$. Graphically, the solution is
