The Notorious Nine Bottle Problem Many ionic compounds dissolve in water. When an ionic compound dissolves in water, the cation and anion of the solid are separated into aqueous ions (abbreviated as the state aq). This physical process is called solvation and results when polar water molecules are able to solvate (surround) each ion and

## Chemistry 128L: General Chemistry II

The Nine-Bottle Challenge Name\_\_\_\_\_ Background: Almost all salts ("salt" is a name for an ionic compound) exist in water solutions as separated ions. For example, a solution of sodium chloride contains  $\text{Na}^+$  ions and  $\text{Cl}^-$  ions, and no  $\text{NaCl}$  species. When solutions of different salts are mixed, the ionic species present may
