Human Planet TV Review - Common Sense Media

The only 7,000 years old Sahara, the planet's vastest sand-pan, counts many tribes. The stony Gobi enjoys melting snow, wind-transported in all the way from Siberia, but also counts roaming wolves. In the most arid Araucana, capturing the rare precipitation is an extremely refined art.

Human Planet - Season 1 - IMDb

Though the term has sparked much debate, aerial photographer George Steinmetz's new book, The Human Planet: Earth at the Dawn of the Anthropocene, leaves little doubt that our footprint on the Earth is profound and vast.
