You should have previously identified at least two exits and conducted fire drills with your family so that they know exactly what to do. Get the heck out of there if it's clear the fire isn't the kind that can't be doused easily by your fire extinguisher (you should have more than one placed in susceptible areas). Don't wait to grab personal items, you might have only seconds to safely leave.

In reality, home fire sprinkler systems are often as cost efficient as a cabinet or carpeting upgrade. Nationally, the expense averages 1 percent to 1.5 percent of the total building cost when they are installed during new home construction, which is the easiest and least expensive time for installation.
