List Impact Factor Of Journals 2013 | happyhounds.pridesource

Journal impact factors are influenced heavily by a small number of highly cited papers. In general, most papers published in 2013–14 received many fewer citations than indicated by the impact factor. Two journals (Nature [blue], PLOS ONE [orange]) are shown to represent a highly cited and less cited journal, respectively.

Impact factor - Wikipedia

An aggregate journal impact factor of 1.0 implies that the articles in the subject category published in recent two years have been cited once on an average. The median Impact factor is the median value of all journals impact factors in the subject category. The journal impact factor extenuates the significance of absolute citation frequencies.

Journal Impact Factor

In 1972, Garfield proposed the use of a metric to evaluate journal impact 1. Thomson Reuters now reports this metric, the Journal Impact Factor (JIF), which is calculated as the number of citations to papers published in a particular journal over a 2-year period divided by the total number of papers published by the journal in those 2 years.
