Individual sections are devoted to epidemiology, diagnostic strategy, lung infections, non-infectious pulmonary involvement, and treatment, including decision making in patients with acute respiratory failure. Each of these sections contains a number of chapters, all written by leading international experts.

Pulmonary Involvement in Patients with Hematological ...

Background/Purpose: The prevalence of SLE pulmonary involvement varies depending on several factors, including diagnostic methods. In this study, we sought to determine the frequency of involvement with different diagnostic methods in a single-center cohort.

Methods: 300 randomly chosen patients with SLE were included. Chest x-ray (CXR), lung spirometry, carbon monoxide diffusion test (DLCOc ...

Various acute pulmonary complications may occur in patients with hematologic malignancies because they are in an immunocompromised state due to systemic disease or to chemotherapy or hematopoietic stem cell transplantation.

Acute Pulmonary Complications in Patients with Hematologic ...

The CT score of non-GGO lesions was used to evaluate residual pulmonary involvement. This was because an extended GGO area with decreased density may have occurred in some patients after discharge, and GGO is even a basic manifestation of convalescence, which could have led to over-estimation of the CT scores.
